ESIM SAS

La filtration sur mesure

ESIM SAS

Custom filtration.

The Flexibility ESIM

Thank to its engineering department, ESIM SAS is able to meet all your fluid filtration needs thanks to multiple technologies.

Our filtration systems

Our products are divided into 4 categories:

- The **self-cleaning filters** whose cleaning is obtained by the action of the scrapers on the rotating filter bobbins.
- **Cartridge filter,**
- **Basket filter,**
- **High pressure Y filter.**

« The important points of the ESIM company, are their custom filtration systems and solutions for the rewinding on filter media for self-cleaning filters, which considerably reduce the cost of implementation and maintenance. »

Since 1978 ESIM SAS equips all surface boats and submarines of the French Navy and the Foreign Navies.

Our professionalism, our reactivity and our quality level, allow us to always be part of the supplier's panel in specific equipment and also in the manufacture of spare parts on plans for French NAVAL GROUP and Foreign NAVAL GROUP (ex DCNS).

For more information about our technologies, do not hesitate to contact us and to consult our website.

Principal clients

- NATIONAL NAVY
- FOREIGN NAVIES
- EXXON
- SYNGENTA
- PPG
- JEUMONT
- EDF
- CLARIANT
